ACCREDITATION
CANADA

Accreditation Canada

📍 1150 Cyrville Road, Ottawa, Ontario, K1J 7S9, Canada

+ 1-613-301-7534

👤 **Katerina Tarasova**, Executive Vice President

✉ katerina.tarasova@accreditation.ca

🌐 <https://accreditation.ca/>

Accreditation Canada, an independent not-for-profit, strives to enhance global healthcare quality. Collaborating with 7,000+ providers in 50+ jurisdictions worldwide, our strategic shift emphasizes patient pathways, integrated health systems, and person-centered care. Fully embracing person-centered care, we involve patients in standards creation within our affiliate, Health Standards Organization (HSO). Patients actively contribute to assessment services, impacting outcomes during on-site visits—an approach known as People Powered Health.

This extension of the patient-centered philosophy, encouraged in organizational standards, recognizes that better results stem from patient partnerships. Accreditation Canada is committed to empowering individuals who share our dedication to achieving quality health services for all.

Founded by a visionary nurse-entrepreneur, our company has been a trusted leader in healthcare staffing for over 15 years, operating across Canada, the USA, the UAE, and Saudi Arabia. We specialize in providing hospital managers, executives, and front-line nursing professionals to meet critical staffing needs. Our reputation for rigorous vetting processes and efficient talent placement has made us the preferred partner for large hospital chains seeking high-quality, timely solutions.

Beyond staffing, we also offer nursing education programs to upskill healthcare teams and ensure excellence in patient care. Additionally, we provide high-tech home health solutions, combining advanced technology with personalized care to support patients outside hospital settings.

With a commitment to innovation and quality, we exceed industry expectations by delivering reliable, skilled healthcare professionals and tailored solutions that address today's evolving healthcare challenges.

BioAro Inc

📍 Calgary Place Tower 1, #1020 - 330 – 5th Avenue SW, Calgary, Alberta, T2P 0L4, Canada

+1-403-250-2221

👤 **Nishanth Saseendran**, Business Development Manager

✉ nishanth@bioaro.com

🌐 <https://bioaro.com/>

🏢 Booth: H3.G53

BioAro Inc., a Canadian biotech pioneer, leads precision medicine and genomic analysis through AI, ML, and quantum computing. Their flagship solutions include BioELR, an AI-powered electronic medical record system, and PanOmiQ, a rapid genomic analysis platform. BioELR enhances patient care via real-time monitoring, predictive models, and IoT integration, proving essential for hospitals, senior care, and telemedicine by optimizing clinical workflows. PanOmiQ accelerates genome processing, delivering insights in under 7 hours and even as fast as 15 minutes for tailored treatments.

ISO-certified (9001, 15189, 13485) and holding over 70 patents, BioAro's expertise in AI, genomics, and medical devices highlights its commitment to innovation. Key partnerships include collaborations with the Prostate Cancer Centre, Geneasic, MGI, and Canadian universities, focusing on integrating genomics into healthcare. Further partnerships with Quantum Basel, McGill, and AMII are underway to expand quantum computing and AI applications in medicine.

With operations in Canada, the USA, Dubai, and the Netherlands, BioAro is poised for global growth, planning expansions into the UK, Singapore, Qatar, and South Korea. Combining precision medicine with AI-driven advancements, BioAro is at the forefront of transforming healthcare through genomic insights and personalized care.

BioLytical Laboratories

📍 13251 Delf Pl, Unit 406, Richmond, BC, V6V 2A2, Canada

+1-866-674-6784

👤 **David Weaver**, Commercial Director

✉ marketing@biolytical.com

🌐 www.biolytical.com

🏢 Booth: H3.G56

BioLytical Laboratories Inc. is an industry leader in manufacturing rapid in vitro diagnostic tests focusing on infectious diseases.

We're on a global mission to ensure every person has access to our tests to learn their status, faster.

bioLytical's story starts in 2002 with an idea to create equitable access to a safe and accurate HIV rapid test. We wanted to address the gaps, help people know their status, and connect to treatment quickly. So, we developed the world's fastest HIV test using the INSTI® platform, capable of performing the test and getting results in just one minute.

The INSTI® platform uses proprietary technology to provide reliable results using a drop of blood in one minute or less. Along with the iStatis lateral-flow platform, we can detect infectious diseases through antibodies and antigens. Healthcare providers trust INSTI® and iStatis as vital tools to help fight the most serious diseases.

BIOTWIN[®]

BioTwin

📍 1405 Boul du Parc-Technologique, Québec, G1P 4P5, Canada

👤 **Louis-Philippe Noel**, Founder, CEO

✉️ lpnoel@biotwin.ai

🌐 www.biotwin.ai

BioTwin revolutionizes precision medicine through human Virtual Twin.

BioTwin develops clinical decision support tools for healthcare professionals by creating virtual human twins derived from metabolomic profiling associated with different health conditions. This unique technology developed by BioTwin uses tens of thousands of biomarkers from biological samples collected with a non-invasive collection kit directly from home.

BioTwin's Virtual twins are aimed at facilitating healthcare professionals' decisions in early detection, remote monitoring, historical data tracking, prognosis, treatment support, prediction, and simulation.

Therapeutic applications are endless, current focus is oncology, diabetes, allergies, women's health, and chronic fatigue.

CVPT (Canada Vitamins and Pharma Tech) is a one-stop solution for dietary supplement contract manufacturing. Our facility in Edmonton, along with our partner facilities across Canada, makes us a leading provider known for high quality and efficiency.

Our full-service offerings include everything from product development and formulation to regulatory compliance, manufacturing, and delivery.

Our brand, Puravita, is dedicated to providing enjoyable and great-tasting health products tailored to meet a diverse range of patient needs. We are committed to creating health solutions for every patient, regardless of condition. For those with difficulty swallowing or eating, we produce specialized medications suited to all age groups, from infants to adults.

In addition to meeting specific patient needs, our company is dedicated to upholding nutritional and religious values, offering products that are vegan and Halal-compliant. Our offerings, such as diabetes medications, Vitamin D, Vitamin B, B-complex, as well as gummies and liquid supplements, are available on Amazon and other online platforms. As we expand, we aim to bring this patient-focused approach to more countries beyond North America and Canada.

👤 **Sumrita Bhat**, Founder

✉ sumritabhat@conlisglobal.com

🌐 <https://conlisglobal.com/>

Conlis Global Inc (CGI) core business revolves around pioneering innovative bone void fillers with the primary goal of enhancing human health and wellness. CGI has developed a groundbreaking bone filler products, called NanoCement (worlds first nanotechnology based bone void filler) aimed at addressing a wide array of clinical applications. By combining cutting-edge scientific research and extensive product development CGI's goal is to bring these innovations to the markets across the globe. By working collaboratively with a multidisciplinary team of experts, including orthopedic specialists, regulatory professionals, and business advisors, CGI endeavors to navigate the intricate path from research and development to successful market introduction, ultimately contributing to advancements in bone regeneration.

CGI was founded by a team of like-minded professionals who are passionate about bringing innovative technologies to the commercial space. We have firsthand experience with the challenges and obstacles that many technologies face in the process of commercialization, including a lack of resources and commercial planning, a lack of the necessary skills and expertise, and a lack of understanding of regulatory and compliance standards. At CGI, we are committed to bringing innovative technologies to the world, and to making a positive impact through the strategic application of technology.

ConsidraCare

📍 L14-60 Queen Street E, Brampton, Ontario, L6V 1A9, Canada

+1-647-205-1972

👤 **Tauseef Riaz**, Cofounder

✉ tauseef.riaz@considracare.com

🌐 <https://www.considracare.com/corporate/>

ConsidraCare is a physician-led, AI-integrated senior care platform that streamlines the delivery of affordable, high-quality care to seniors at home, in retirement facilities, and in hospitals.

Since launching in 2022, we've delivered over 100,000 hours of care and doubled revenue annually. Our team of 130 professionals operates in 20 cities across Canada and Pakistan, enabling home care entrepreneurs to launch and scale globally. We plan to expand into the Middle East and the USA in 2025.

Our platform automates all aspects of home healthcare—from screening and managing caregivers to building personalized care plans. With integrated AI-powered tools, we support caregivers, enhance care quality, and help families stay informed and navigate all aspects of elder care through educational resources. Our business-in-a-box model enables care providers to rapidly launch and manage care businesses globally, simplifying operations and accelerating growth.

While the demand for care for a global aging population is creating a trillion-dollar market, there is a significant lack of scalable global platforms to meet the rising need for senior care. ConsidraCare wants to fill this gap by offering an accessible, efficient, and scalable solution for affordable, high-quality home care services worldwide.

Deep Breathe

Deep Breathe

📍 100 Collip Cir, Suite 240, London, Ontario, N6G 4X8, Canada

+ 1-416-333-6385

👤 **Chris Grubb**, Director, Business Development

✉️ chris@deepbreathe.ai

🌐 deepbreathe.ai

Deep Breathe combines the largest proprietary lung ultrasound dataset with world leading ultrasound expertise to create a targeted AI platform that unlocks the exciting potential of lung ultrasound to address some of the most common lung concerns that drive chest x-ray imaging, including pneumothorax, pneumonia or heart failure. By allowing anybody to rapidly perform lung imaging – anywhere – we will disrupt the existing lung imaging market while creating new verticals where reliable lung imaging has not otherwise been able to exist (pre-hospital, military, aerospace, veterinary).

Deep Breathe's AI models use computer vision to replicate expert clinician interpretation of lung ultrasound. Our current products include: ClarifAI, a masking tool that removes any and all information extraneous to the ultrasound beam from medical images to create a clean and anonymized dataset for model development; Pleff-Net, a novel deep learning solution that identifies the presence of pleural effusion on lung ultrasound with clinician-level accuracy; PneumoGo, a lung sliding classifier that uses a computer vision model to accurately rule out pneumothorax by automating the interpretation of the lung sliding artifact, and an A/B Line Classifier that automates the detection of normal and abnormal lung parenchyma on lung ultrasound at the patient's bedside.

Edmonton Global

📍 Suite 2205 10020 100 ST NW, Edmonton, Alberta, T5J 1N5, Canada

Edmonton Global is an economic development organization that represents 14 municipalities that make up the Edmonton Metropolitan Region. Home to more than 1.4 million people and generating \$107 billion in GDP, the Edmonton Metropolitan Region is Canada's 5th largest economy, and fastest-growing region. Globally-connected, the Edmonton region is fueled by world-class health research, a top region for biotech in Canada, a fast growing pharmaceutical sector and North America's top AI/ML hub.

Life science companies in the Edmonton Region are part of a strong, growing, and tight-knit community working at the cutting edge of scientific breakthroughs.

Researchers in the Region are at the forefront of discoveries in diabetes, virology, precision health, artificial intelligence, and more. We are home to world-class research facilities including the Alberta Diabetes Institute, Li Ka Shing Institute of Virology, the Cross Cancer Institute, and the Alberta Machine Intelligence Institute. We are also home to Canada's largest, fully integrated healthcare system, serving a diverse population of 4.3 million people – a valuable asset for clinical trials and real-world data access.

The Edmonton Region is quickly emerging as a hub for life sciences companies who are looking at Canada as the next destination in their global expansion.

HealthEMe is an award winning evidence based Healthcare Innovation initially developed for Mental Health and now serving various chronic illness. Currently in various stages of implementation across 6 countries, it is revolutionizing healthcare delivery without disrupting the clinical workflow.

With former healthcare administrators at the helm, coupled with expert physicians, HealthEMe is redefining care precisely when patients need it most; before, during the critical stages of deterioration while awaiting care and at various transitions between levels of care.

Our innovative SaaS solution, built with evidence based clinical tools includes self management that are fully consumerized, longitudinal trending, AI based emotional tracking, intelligent triaging, care planning, secure communications, journaling, medication management and a suite of features customizable as a white label.

With clients in various chronic illnesses, HealthEMe also works with clients in education, pharma, and insurance. By prioritizing efficacy and personalization, we are affecting health outcomes, one patient at a time for large and small institutions alike. Without replicating the issues that come with telehealth, we are delivering on a new approach where patients rely on evidence for managing their care, no matter where they are in their care journey.

+1-780-860-2719

👤 **Colin Coros**, CCO

✉ colin.coros@nanosticsdx.com

🌐 <https://www.nanosticsdx.com/>

Nanostics is a commercial-stage company that uses artificial intelligence and machine learning to help bring clarity to health care decisions. Its core technology, ClarityDX[®], combines biomarker and patient derived data to create accurate disease risk scores, which are applicable to a wide range of cancers and other diseases. Nanostics' lead product, ClarityDX Prostate[®], is being used across Canada to more accurately identify men with clinically significant prostate cancer and reduce the number of unneeded biopsies.

ClarityDX Prostate is a cost-effective, scalable test that can be seamlessly integrated into prostate cancer screening. As a reflex test for men with elevated PSA levels, it leverages machine learning and can be performed in any clinical lab worldwide. Proven in a study of 3,448 men, ClarityDX Prostate is four times more specific than PSA alone in detecting aggressive prostate cancer.

Natural Factors

Natural Factors is one of the largest manufacturers of dietary supplements, natural health products in North America with manufacturing facilities in Canada, the United States and Australia. We have close to 1,000,000 square feet of space across 17 locations in North America, housing offices, manufacturing and production facilities, laboratories, distribution centers, and warehouses.

With over 1,000 acres of certified organic farmland in the Okanagan Valley of British Columbia, we grow an astonishing variety of crops for production and research. By owning and maintaining our farms, we are able to learn how to generate the most nutritious ingredients.

Our manufacturing capabilities include softgel and two-piece hard-shell encapsulation, tableting, liquid and powder extraction, multi-ingredient aqueous granulations, and a liquid fill line.

We care about the quality, purity, and efficacy of our products. Earning your trust means going above and beyond every day with every product. We have always insisted on pharmaceutical standards for all our raw materials and products. If we can't guarantee 100% safe, pure, and potent raw materials for a formula, we won't make that product.

We are actively exporting to over 70 countries worldwide and we are interested in expanding our business to more countries.

Created by senior Clinical Investigators with decades of experience in clinical trials, PI-Enroll® was developed to reverse the increasing trend amongst PIs to relegate their responsibilities to their site's Study Coordinators, Physician Assistants and/or trainees. It does so by saving PIs the time and effort required to complete their tasks. It does so by solving four main problems site teams face. PI-Enroll saves site teams time and effort, increases study awareness and referrals from HCPs, improves communication and addresses patient centricity and DEI in clinical trials. By solving site teams' pain points, PI-Enroll has increased patient enrollment by 80% in recent phase 3 studies.

Rehabtronics Inc

✉️ rahul@rehabtronics.com

🌐 www.rehabtronics.com

Rehabtronics is dedicated to revolutionizing both pressure injury prevention and neuro-rehabilitation through its innovative product lines, Prelevia and ReHab. By combining advanced neuromodulation and sensor technologies Rehabtronics empowers patients and healthcare providers with tools that improve patient outcomes, and reduce health care costs

Prelevia focuses on preventing pressure injuries (bedsores) in vulnerable patients. Prelevia is the world's first early intervention for pressure injuries (bedsores) and has been shown to reduce pressure injury damage by 80%.

Our Rehab product line, including ReGrasp, ReJoyce, and ReTouch, addresses upper-limb rehabilitation for patients recovering from neurological injuries such as stroke or spinal cord injury. These devices use functional electrical stimulation and interactive gamified exercises to help patients restore motor function and regain independence in daily activities. By combining advanced hardware with patient-centered design, Rehabtronics enables smoother, faster recovery and personalized therapy.

With Prelevia and Rehab, Rehabtronics is setting a new standard in injury prevention and neuro-rehabilitation. Driven by a commitment to innovation and quality of life, Rehabtronics delivers hope and practical solutions for patients and caregivers worldwide, reshaping healthcare's approach to recovery and preventive care.

CDIC is promoting its award-winning chronic disease prevention and management model, developed by the Wellness Institute (WI) at Seven Oaks Hospital. WI provides comprehensive disease prevention, injury rehabilitation, and chronic disease treatment through medically informed exercise, nutrition, and lifestyle medicine interventions. Delivered by highly trained health and fitness professionals, our programs support long-term health and recovery. Enhanced by cutting-edge technology, including advanced monitoring tools and personalized digital platforms, WI ensures a data-driven approach that optimizes outcomes and empowers individuals to take control of their health and wellness.

The core offerings include:

- Individualized Health Risk Assessment & Personalized Wellness Plans
- Membership to a state-of-the-art medically supervised facility
- R/x Exercise & Education Programs – Cardiac Health, Pulmonary Health, Diabetes, Arthritis, Neurological Disorders, Back Pain, Post-Surgery Recovery, Pelvic Floor Rehabilitation, and Cancer Recovery.
- Occupational Healthcare – workplace prevention and rehabilitation
- Executive Health Assessments – specialized assessments.
- Weight Loss & Risk Reduction Clinic - GLP1 & lifestyle interventions

WI's proven model has been implemented across various sectors, including healthcare facilities, residential and active aging communities, wellness resorts, insurance companies, and corporations. Operating globally under the Canada Wellness Institute (CWI) brand, WI has formed partnerships throughout Canada and Asia, expanding its reach and impact.

SINOVEDA

Sinoveda CHP Inc.

📍 4294 91A St NW, Edmonton, Alberta, T6E 5V2, Canada

👤 **Nuzhat Tam-Zaman**, Founder and CEO

✉️ ntzaman@sinoveda.com

🌐 sinoveda.com

Sinoveda CHP is an independent marketing arm of Sinoveda Canada Inc. Established in March 2022, Sinoveda CHP markets consumer health products developed by Sinoveda Canada Inc., which uses their patented Pharmaceutical Platform Technology (PPT) to identify the active compounds in plants that can be used to make consumer health products. Our mission is to provide high-quality and healthcare products that promote wellness and self-care. We aim to create a community of consumers who prioritize their health and well-being. Our goal is to empower individuals to live healthier, happier, and more sustainable lives. In addition to being designed, manufactured, and approved by Health Canada our products, developed using PPT, are unique because dosages of bioactives from plants are well-defined; therefore, we can guarantee batch to batch consistency in addition to optimum safety and efficacy. Competitor products do not have this feature, and are highly variable, with little or no batch-to batch consistency.

SKYDATA-IoT

✉ akbarh@skydata-iot.com

🌐 www.SKYDATA-IoT.com

SKYDATA-IoT provides global cellular connectivity services for the Internet of Things (IoT). Our mission is to empower businesses and organizations with seamless and reliable connectivity, enabling them to harness the full potential of their remote devices.

In today's rapidly evolving digital landscape, the ability to transfer critical data swiftly and securely is essential, especially in healthcare. Our specialized services facilitate the real-time transmission of vital patient information, ensuring that healthcare providers can promptly monitor and respond to patient needs. By connecting medical devices and systems with cellular connectivity, we enhance patient care for better health outcomes.

We deliver high-performance connectivity solutions tailored to your business's unique requirements with coverage in 200+ countries, more than 700 carrier partners, and a secure online client SIM management portal. Whether managing remote patient monitoring systems, smart medical devices, conducting decentralized clinical trials, or any other medical machine-to-machine (M2M) application, SKYDATA-IoT stands at the forefront, driving innovation and efficiency.

We also prioritize security. We can implement advanced measures to protect sensitive information. Partnering with us means you gain access to a trustworthy and scalable connectivity solution that adapts to your organization's ever-changing needs.

Join us in revolutionizing how IoT connects and transforms the healthcare industry.

🏢 Booth: R.L04

Repair and healing of lumbar and cervical intervertebral disc pathology has been limited and the most difficult cases have ultimately required surgical intervention. A new, innovative method to non-surgically repair intervertebral discs has proven its efficacy over the past 22 years. SpineMED® is recognized as the World leader in non-surgical Spinal Decompression. Our patented design represents the most efficient decompression technology available worldwide. Rather than repackaging 50-year old traction equipment, SpineMED® offers a fundamentally new technology to assist in the non-surgical and natural healing and repair of lumbar and cervical disc pathologies--with proven clinical results.

SpineMED®'s exclusive pelvic restraint system and unique pelvic tilt control allows patients to achieve targeted distraction with 50% to 70% lower force than our competitors. Lower force reduces negative side effects common on other devices and offers wider patient suitability and increases patient comfort.

🌐 <https://thornhillmedical.com/>

🏢 Booth: H4. E10

A global innovator in respiratory and oxygen-related scientific research and advanced technologies, Thornhill Medical is transforming the delivery of critical care in austere and unpredictable combat casualty care and humanitarian environments. Thornhill Medical's portfolio includes:

MOVES® SLC™ - the only micro-integrated life support system that combines an oxygen (O₂) concentrator, a unique O₂-conserving ventilator, suction, and complete vital signs monitoring in a compact, rugged, portable, battery-operated system, operating without O₂ cylinders. This provides advantages across many domains of operation, including training, logistics, reducing caregiver burden and maintenance.

MADM™ - a compact, portable inline gas anesthesia vaporizer which can work with any ventilator. When used with MOVES® SLC, MADM enables field surgery in the most extreme and challenging environments.

Drawing on 20 years of pioneering science and engineering, Thornhill Medical collaborates with customers, industry, hospital, and military partners in over 19 countries and 65+ research institutes to advance oxygen-based technology for austere scenarios.

🌐 www.trichanalytics.com

Using our innovative hair mineral analysis, TrichAnalytcs Laboratory is leading the way in nutritional health research, offering specialized support for clinical studies tailored to dietary supplement companies. Applying a unique below-scalp analytical technique that requires just a single hair, we provide precise data on an individual's mineral balance and offer insights into hair health. Our method also allows us to track changes over time, capturing shifts in both nutritional mineral levels and hair quality, offering a comprehensive view of progress and improvement potential. Beyond raw data, we provide in-depth interpretation, including clear claims statements, which can be directly integrated into marketing and consumer communications.

Since 2016, TrichAnalytcs Laboratory has leveraged over 20 years of expertise in hair chemistry. Accredited with ISO/IEC 17025 by the Canadian Association for Laboratory Accreditation (CALA), our lab adheres to the highest standards of quality and reliability.

Headquartered on Vancouver Island, Canada, we collaborate with clients across 17 countries. Our commitment is to drive nutritional science forward, offering supplement companies the research-based insights needed to make informed decisions in product development, validation, and strategic marketing.

Zamplo

📍 1938 33rd St SW, Calgary, Alberta, T3E 2S5, Canada

+1-403-890-5452

👤 **Shaneel Pathak**, CEO

✉ shaneel@zamplo.org

🌐 www.zamplo.org

Zamplo Inc is a digital health company focused on transforming patient insights. Our patient-centered platform captures longitudinal patient-reported outcomes (PRO) and wearable data, offering valuable insights into treatment efficacy and patient experiences. Driven by our team's firsthand experience as patients and caregivers, we aim to revolutionize the collection and application of patient insights to improve care.

Zamplo encourages patient engagement by allowing users to own their data during and after programs, empowering them to make informed decisions and share within their care circle, for life. Our scalable solution supports e-consenting, longitudinal data collection for any medical condition or therapy, and compliance monitoring.

Our platform has clinical validation for improving patient engagement and real-world data collection. For instance, the Princess Margaret Hospital in Toronto uses Zamplo to monitor cancer patients remotely during and after radiation treatment. The remote monitoring of patients reduced the number of in-person review sessions by 31%, and 81% of patients reported their physicians discussed all side effects.

Zamplo's primary market is clinical research within clinical care for quality improvement and patient support programs.

ZANIS
