

TRANSPORTATION & LOGISTICS

With air, rail and ground access connecting the city to millions of customers, Calgary is Western Canada's distribution hub.

WESTERN CANADA'S INLAND PORT

With one of Canada's busiest and best-connected airports, major highways north-south and east-west, two of North America's Class 1 railroads, and efficient access to ocean ports, Calgary is a gateway to millions of customers locally and internationally.

The City of Calgary's Goods Movement Strategy is ensuring infrastructure within the city is in place to support longevity and continue to improve the Calgary region's supply chain and transportation ecosystem.

SPACE TO GROW

Calgary offers abundant and affordable industrial land supply. Three major industrial regions offer a network of industrial parks, intermodal facilities and on-airport logistics parks. All have access to rail, road and air transportation. Ample space for development at transportation nodes along major corridors makes Calgary the optimal place to grow your business.

MULTI-MODAL MARKET ACCESS

75%

of Alberta's air cargo shipments are transported through YYC Calgary International Airport.

LEADING DIGITAL TRANSFORMATION

Whether it's feeding, fueling, healing, or moving, Calgary is helping solve the world's problems through the adoption of transformative technologies. From software to hardware and services, digital transformation is quickly becoming the largest driver of new solutions and technology investments among Calgary businesses.

In fact, it's projected that Calgary businesses will spend \$7.5B on digital transformation from 2019 to 2022, part of an \$18.4 billion spend across the province.
